

WARRANTY POLICY

In general, items sold by Aero Components are not covered by any warranty. If an item is sold with a warranty, it will be stated on our invoice along with a Warranty Period. The Warranty Period will be listed as a specific time frame (i.e. 30 Days, 60 Days, etc.). The Warranty Period begins on the invoice date, unless the invoice states otherwise.

If an item sold by Aero Components experiences a normal failure during the Warranty Period, Aero Components will repair, replace, or refund the item at our sole discretion.

The following will void the Warranty:

- Damage resulting from improper installation or handling.
- Shipping damage.
- Exposure to environmental conditions outside of the manufacturer's recommendations.
- Unauthorized repair or repair attempts.
- Tampering with or removing any warranty seals or indicators.

Additional Warranty Terms:

- The customer must notify Aero Components of the warranty claim within the warranty period, and the item must be returned to Aero Components within (7) days of this notification.
- Items returned to Aero Components for a warranty claim must be properly packed to ensure the item is not damaged during shipment.
- Removal costs and installation costs are the responsibility of the customer.
- Customs fees, duties, and taxes are the responsibility of the customer.
- Shipping costs are the responsibility of the customer.
- Labor costs, loss of use, loss of revenue, or any other additional costs are not covered by the Aero Components Warranty.
- If an item is returned for a warranty claim and it is found to be in functional condition, a re-certification fee will apply.

AERO COMPONENTS SPECIFICALLY DISCLAIMS ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND WARRANTIES OR MERCHANTABILITY.
